## Brera

## Perché sono bioclimatiche? / What makes them bioclimatic?

### **ENERGIA NATURALE**

Grazie ad energie naturali quali il sole ed il vento creano un ambiente gradevole e vivibile modulando la luce del sole e regolando il flusso dell'aria.

### **RISPARMIO ENERGETICO**

Riducono i consumi di ventilazione, riscaldamento, climatizzazione ed illuminazione rispettando l'ambiente circostante e limitando l'inquinamento.

### **MICROAMBIENTE CLIMATICO**

La temperatura viene regolata tramite un semplice e naturale sistema di ombreggiamento e protezione offerta dalla Serie Brera e dalle tende integrate Raso (Brera S).

### **ARCHITETTURE BIOCLIMATICHE**

Rispondono a moderni parametri di architettura bioclimatica che richiedono il rispetto dell'ambiente, la riduzione di risorse inquinanti, interventi di manutenzione e la creazione di ambienti dal comfort termico.

### **COMFORT DENTRO CASA**

Offrono un comfort naturale anche negli ambienti interni.

### **ECOLOGICHE**

I materiali utilizzati nelle pergole bioclimatiche Pratic sono riciclabili al 99%.

### **OPEN AIR TUTTO L'ANNO**

Ampliano gli spazi e rendono gli ambienti "open air" vivibili tutto l'anno.

### **NATURAL ENERGY**

*Thanks to natural energies such as the sun and the wind, they create a pleasant and livable environment, thus modulating the sunlight and adjusting the flow of air.*

### **ENERGY SAVINGS**

*They reduce the consumption of ventilation, heating, air conditioning and lighting, so respecting the surrounding environment and limiting pollution.*

### **CLIMATIC MICRO-ENVIRONMENT**

*The temperature is adjusted by a simple and natural shading and protection system offered by Brera Series and the integrated Raso awnings (Brera S).*

### **BIOCLIMATIC ARCHITECTURE**

*They respond to modern parameters of bioclimatic architecture that require respect for the environment, the reduction of polluting resources, maintenance works and the creation of environments with thermal comfort.*

### **INDOOR COMFORT**

*They offer natural comfort even indoors.*

### **ECOLOGICAL**

*The materials used in Pratic bioclimatic pergolas are 99% recyclable.*

### **OPEN AIR ALL YEAR ROUND**

*They extend the spaces and make open air environments livable all year round.*

## Vantaggi e design / Advantages and design

### **LUCE E COMFORT**

Il sistema di lame Brera può compattarsi in uno spazio ridotto lasciando entrare pienamente la luce, fermarsi in qualsiasi posizione intermedia desiderata o chiudersi per offrire la massima protezione.

### **AMBIENTI SUGGESTIVI**

Le strutture Pratic sono ancora più eleganti grazie ai LED Line disponibili con colorazione bianca o RGB.

### **TENDE PERIMETRALI E VETRATE SCORREVOLI**

Per una maggiore protezione perimetrale e privacy, Brera P può essere completata con la tenda verticale Raso, a scomparsa e integrata alla struttura, o, per Brera P e Brera S, con le vetrate scorrevoli Slide Glass.

### **ADATTABILITÀ**

Perfecta in spazi privati (terrazzi, giardini), pubblici e commerciali (ristoranti, bar, discoteche e spiagge).

### **DESIGN**

Struttura dall'estetica lineare, raffinata e pulita senza elementi di fissaggio a vista con l'utilizzo delle staffe telescopiche.

### **LIGHT AND COMFORT**

*The Brera blades system can compacted save on space letting you enter fully light, stop in any position desired or close to offer maximum protection.*

### **ATTRACTIVE ENVIRONMENTS**

*Pratic structures are even more elegant thanks to the Line LEDs available with white or RGB color.*

### **PERIMETER AWNINGS AND SLIDING GLASS**

*For greater perimeter protection and privacy, Brera P can be completed with the Raso vertical awning, con-cealed and integrated into the structure, or, for Brera P and Brera S, with the Slide Glass windows.*

### **ADAPTABILITY**

*Perfect in private spaces (decks, gardens), public or commercial (restaurants, bars, night clubs and beaches) areas.*

### **DESIGN**

*Structure with a linear, refined and clean appearance without visible fasteners with the use of telescopic brackets.*

**SICUREZZA**

L'intera struttura e le singole componenti sono state sottoposte ad analisi strutturali preliminari agli Elementi Finiti (Fem), a numerose prove meccaniche e dinamiche di stess e sono state certificate da professionisti esterni per garantire la sicurezza e la qualità Pratic.

**COLORI**

La Serie Brera è realizzabile in qualsiasi colorazione; è possibile richiedere la verniciatura diversa anche solo delle lame o della struttura.

**SAFETY**

*The entire structure and individual Brera components have undergone preliminary structural finite element analysis (FEA), numerous mechanical and dynamic stress tests, and have been certified by external professionals to guarantee safety and quality.*

**COLOURS**

*Brera Series can be manufactured in any color; it is possible to request a different colour of the blades or of the structure.*

## Plus tecnici / Technical benefits

---

**PRESASSEMBLAGGIO**

Per agevolare i nostri installatori e svolgere in sicurezza il montaggio, le strutture Pratic vengono pre-assemblate in macro-assiemi funzionali presso la nostra sede da operatori specializzati.

**PREDISPOSIZIONE IMPIANTO DI DEFLUSSO ACQUA**

Tutte le parti ove necessario vengono sigillate e predisposte per il deflusso dell'acqua.

**TARATURA DEI MOTORI**

È cura dell'azienda Pratic fare tutti i cicli di autoapprendimento dei motori, tarare i fine corsa superiori delle Raso e sintonizzare tutte le funzioni dei telecomandi.

**PREDISPOSIZIONE IMPIANTO ELETTRICO**

Certificato IP 55, canalizzato e cablato in scatole con connessioni stagnate ove possibile dalle intemperie. I motori e le luci sono da 24 Volt (esclusi motori Raso). L'impianto elettrico è con cavi armonizzati accettati in tutta la Comunità Europea.

**VANO TECNICO ISPEZIONABILE**

Il vano tecnico per trasformatori, centraline ricevitori e scatole di cablaggio è facilmente accessibile (Brera P: collocato sui profili montanti - Brera S: collocato sui profili portanti - Brera B: collocato all'interno del vano motore o in profilo esterno).

**INSTALLAZIONE FACILITATA**

Per agevolare l'installazione in piano è possibile richiedere:

- il taglio dei montanti a misura,
- le staffe telescopiche,
- fissaggio a soffitto su misura.

**PRESASSEMBLY**

*To simplify installation and improve security during installation, Pratic structures are pre-assembled in functional macro-assemblies at our site by specialised operators.*

**PREPARATION OF WATER DRAINAGE SYSTEM**

*All parts requiring it are sealed and prepared for water drainage.*

**MOTOR CALIBRATION**

*It is the responsibility of the company Pratic to run all the self-learning cycles of the motors, to calibrate the upper limit switches of the Raso awnings and to tune all the functions of the remote controls.*

**PREPARATION OF THE ELECTRICAL SYSTEM**

*IP 55 certified, ducted and wired in boxes with waterproof connections to provide protection wherever possible from weather. The motors and lights are 24 Volt (excluding the Raso engines). The electrical system is with harmonized cables accepted throughout the European Community.*

**INSPECTABLE TECHNICAL COMPARTMENT**

*The technical compartment is easily accessible for transformers, receivers and wiring boxes (Brera P and Brera S: placed on the supporting profile sections - Brera B: placed inside the technical compartment or other profile).*

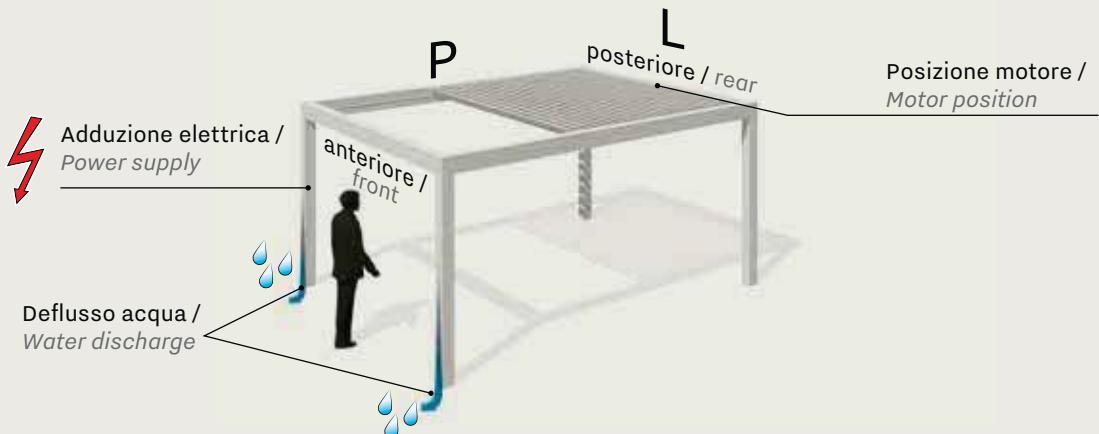

**SIMPLIFIED INSTALLATION**

*To simplify level installation, the following can be requested:*

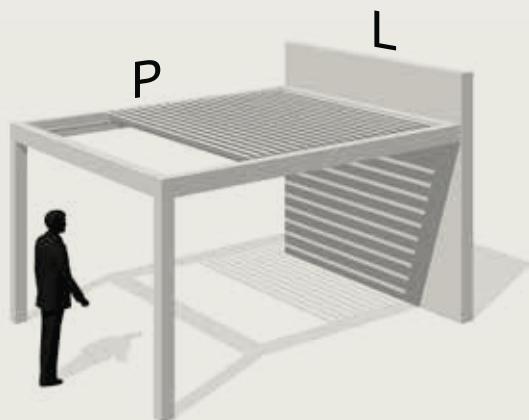

- custom cutting of sections,
- telescopic brackets,
- custom ceiling mounting.

### VERSIONE AUTOORTANTE / SELF-SUPPORTING VERSION

### VERSIONE FISSAGGIO LATO LARGHEZZA / VERSION MOUNTED ON THE WIDTH SIDE

### VERSIONE FISSAGGIO LATO PROFONDITÀ / VERSION MOUNTED ON THE DEPTH SIDE

### LEGENDA / LEGEND

#### Punto di vista

La figura, posizionata sempre frontalmente alle lame, indica il punto di vista, è utile per compilare il modulo d'ordine.

#### Adduzione elettrica

In fase di compilazione ordine specificare dove sarà posizionata.

Il montante predisposto per l'adduzione elettrica è sconsigliato per il deflusso dell'acqua.

#### Deflusso acqua

In fase d'ordine specificare su quali montanti predisporre lo scarico d'acqua. Su una configurazione a 1 modulo, devono essere previsti almeno 2 deflussi d'acqua.

Attenzione: è necessario posizionare gli scarichi uno a destra e uno a sinistra rispetto alla vista frontale della struttura. Per ogni modulo aggiuntivo è necessario aggiungere almeno 1 ulteriore deflusso d'acqua.

#### Point of view

The figure, always positioned in the front of the blades, indicates the point of view, it is useful to fill in the order form.

#### Power supply

When filling the order, please specify where it will be placed. The post prepared for the power supply is not recommended for water discharge.

#### Water discharge

During the order phase, please specify on which posts you would like to prepare the water drainage. On a 1-module configuration, at least 2 water discharges must be provided. Warning: it is necessary to place one drainage on the right and the other on the left with respect to the front view of the structure. For each additional module it is necessary to add at least 1 additional water discharge.

## Caratteristiche generali

- Pergola bioclimatica con lame frangisole compattabili
- Moduli accoppiabili (Brera P e Brera S)
- Massimo ingombro lame impachettate:  
Lama : H20 - Ingombro max: 80 cm  
Lama : H30 - Ingombro max: 110 cm
- Struttura con gronde e scarico acqua nei montanti (Brera P e Brera S)
- Struttura realizzata con profili in alluminio estruso, lega primaria UNI6060 e UNI6063
- Carter in poliammide personalizzato
- Cuscinetti radiali a sfere con doppia gabbia di protezione
- Pulegge realizzate in nylon 6.6 caricato vetro
- Cinghia di trasmissione in poliuretano con trefoli in acciaio
- Resistenza al vento fino a grado 11 della scala Beaufort
- Motore Safety Box

### INDICAZIONI IMPORTANTI

- Su ogni modulo dovranno essere previsti almeno due montanti per lo scarico dell'acqua (attenzione, è necessario posizionare gli scarichi uno a destra e uno a sinistra rispetto alla vista frontale della struttura) (Brera P e Brera S)
- Il montaggio dev'essere fatto a regola d'arte garantendo che la struttura portante superiore sia perfettamente in piano per permettere il corretto deflusso dell'acqua
- Per l'installazione è consigliato l'utilizzo di un sollevatore (Ercolino p. 116)
- Si raccomanda di controllare periodicamente che gli scarichi delle gronde non siano ostruiti
- In caso di Brera S o Brera P abbinate a Slide Glass: le vetrature scorrevoli, anche se impacciate, offrono una superficie maggiore alla spinta del vento. I luoghi di posa necessitano pertanto di una particolare attenzione alla resistenza al vento.

### SERVIZI

- Per agevolare l'installazione in piano è possibile richiedere il taglio dei montanti a misura
- La struttura viene fornita in macro assiemi funzionali comprensivi di:
  - impianto elettrico e cablaggi
  - impianto di deflusso dell'acqua

## General features

- Bioclimatic pergola with retractable blades*
- Coupling modules (Brera P and Brera S)*
- Maximum size retracted blades:*  
*Blade: H20 -Size max: 80 cm*  
*Blade: H30 - Size max: 110 cm*
- Structure with gutters and water drain in the uprights (Brera P and Brera S)*
- Structure made of extruded aluminum profiles, primary alloy UNI6060 and UNI6063*
- Customized polyamide carter*
- Deep groove ball bearings with double protection cage*
- Pulleys made of nylon 6.6 glass reinforced*
- Transmission belt in polyurethane with steel stands*
- Wind resistance up to 11 Beaufort Wind Force Scale*
- Safety Box motor*

### HIGHLIGHTS

- Every single module must be provided with at least two posts for water drainage (please note that it is necessary to place the discharge points one on the right and one on the left according to the front view of the structure (Brera P and Brera S))*
- The installation must be done in a workmanlike manner ensuring that the upper support structure is perfectly level to allow proper water drainage.*
- For the installation we recommend using a lift (Ercolino p. 116)*
- We recommend to periodically check that the gutter drains are not blocked*
- In case of Brera S and Brera P combined with Slide Glass: the sliding glass closures, even if packaged, offer a greater surface to wind pressure. Therefore, the installation sites require a particular attention to wind resistance.*

### SERVICES

- To ease the flat installation you may require the custom cut of the posts*
- The structure is supplied in functional macro-assemblies consisting of:*
  - electrical system and wiring*
  - water discharge system*

## Configurazioni fuori standard / Out of standard configurations

Per l'effettiva fattibilità della struttura ed il preventivo contattare l'ufficio tecnico: sales@pratic.it

Per un calcolo sommario dei prezzi riferiti a strutture fuori standard consultare documento dedicato su **B2B** /

For the real feasibility of the structure and the quotation please contact the technical office: sales@pratic.it

For a summary calculation of the prices referred to non-standard structures, please refer to dedicated document on **B2B**

## Caratteristiche tecniche / Technical specifications

- Brera P - struttura in alluminio completabile con tende verticali Raso e vetrare Slide Glass
- Pergola con sistema di drenaggio e convogliamento delle acque piovane
- Gronda con scarico integrato nei montanti
- Premontaggio di serie delle pergole e delle parti elettriche
- Due serie di lame:  
H20 fino a L 350 cm  
H30 fino a L 450 cm

- Brera P - aluminum structure that can be completed with built-in Raso perimeter closures and Slide Glass panes
- Pergola with water drainage and piping for rain water.
- Gutters with water drainage integrated into the posts
- Standard pre-assembly of the pergolas and the electrical parts
- Two blades types:  
H20 up to L 350 cm  
H30 up to L 450 cm

### DIMENSIONI

- Moduli accoppiabili
  - Singolo modulo:
    - L max 450 cm
    - P max 610 cm
  - H max 300 cm
  - Passo lama 20 cm
  - Impacchettamento
- p. 96

### DIMENSIONS

- Coupled modules
- Single module:
  - L max 450 cm
  - P max 610 cm
- H max 300 cm
- Blade pitch 20 cm
- Dimension tables

p. 96

### MOVIMENTAZIONE

- Motore

### OPERATION

- Motor

### PRODOTTI COMPLEMENTARI

- |               |       |

### OPTIONAL

- |  |        |
|--|--------|
| · Configurazioni fuori standard                              | p. 28  |
| · Staffe giunzioni perimetrali per installazione Slide Glass | p. 38  |
| · Verniciatura   | p. 42  |
| · Staffe telescopiche  | p. 46  |
| · Predisposizione Raso                                       | p. 85  |
| · Automatismi  | p. 99  |
| · Campionario Pratic   | p. 120 |

### OPTIONAL

- |  |        |
|--|--------|
| · Non-standard configurations                                | p. 28  |
| · Brackets for perimeter joints for Slide Glass installation | p. 38  |
| · Coating  | p. 42  |
| · Telescopic brackets  | p. 46  |
| · Raso arrangement   | p. 85  |
| · Automation   | p. 99  |
| · Pratic collection  | p. 120 |

### INDICAZIONI IMPORTANTI

- Componentistica lame:
  - tappi e lame di movimentazione: INOX finitura naturale
  - copri aste di movimentazione delle lame: plastica colorazione grigio •
- **Domande di brevetto depositate.**  
Alcune delle caratteristiche tecniche del prodotto sono tutelate da relative domande di brevetto

### HIGHLIGHTS

- Blade components:
  - caps and operation blades: stainless steel natural finish
  - covers operation blades: grey-colored plastic •
- **Patents pending.**  
Some technical product features are protected by related patent applications

### STAFFA A TERRA / GROUND BRACKET (STANDARD)

Per agevolare l'installazione in piano è possibile richiedere il taglio dei montanti a misura /

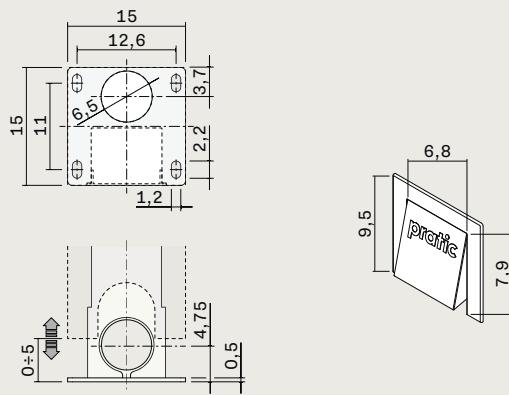

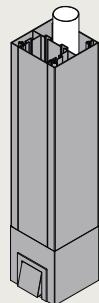

*To facilitate the flat installation you may require custom cut of the posts*

### STAFFA TELESCOPICA / TELESCOPIC BRACKET (OPTIONAL)

Regolabile in altezza fino a 5 cm  
Se ordinata assieme alla Raso saranno fornite le guide e i profili compensatori più lunghi di 5 cm, da adattare in fase di posa /

*Height-adjustable up to 5 cm  
If ordered together with the Raso, it will be provided with guides and compensating profiles 5 cm longer, to adjust during installation*

### DEFLUSSO ACQUA / WATER DISCHARGE

#### N.B.

In fase d'ordine specificare su quali montanti predisporre lo scarico d'acqua. Su una configurazione a 1 modulo, devono essere previsti almeno 2 deflussi d'acqua. Attenzione: è necessario posizionare gli scarichi uno a destra e uno a sinistra rispetto alla vista frontale della struttura. Per ogni modulo aggiuntivo è necessario aggiungere almeno 1 ulteriore deflusso d'acqua.

#### Note

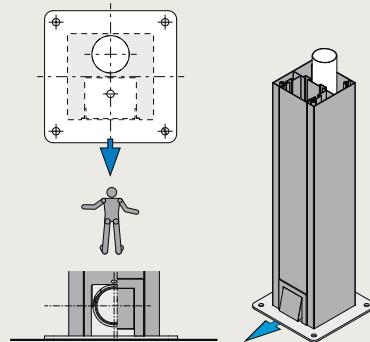

*During the order phase, please specify on which posts you would like to prepare the water drainage. On a 1-module configuration, at least 2 water discharges must be provided. Warning: it is necessary to place one drainage on the right and the other on the left with respect to the front view of the structure. For each additional module it is necessary to add at least 1 additional water discharge.*
